

REF: NAB petition 04-160

In regards to this petition, I would like the FCC to remember who ultimately they are effecting. I do not want my personal choices to be limited to what the FCC allows me to choose from. I should have the right, for example, to choose between a local broadcaster giving traffic and weather, or choose to listen to this same information through satellite radio. This should be my choice, so if NAB petition 04-160 is designed to give me options, and not to protect their assets, then I would be for it. If not, please reject this petition on the basis the consumer must ultimately make that choice, not NAB,

Scott
